Education

Graphic Era Hill University **Aug. 2022 – May. 2025**
Bachelor of Technology in Computer Science *Bhimtal, Uttarakhand*

Relevant Coursework

- Data Structures
- Software Developments
- Database Management
- Cyber Security
- Artificial Intelligence
- Cryptography
- Computer Architecture

Projects

Student Feedback System | *Java, JSP, HTML, CSS, MYSQL, Apache Tomca* **June 2023**

- Developed a dynamic web-based application to streamline the collection and analysis of student feedback on academic courses and instructors. The system enhances transparency and supports continuous improvement in educational quality through structured data gathering and reporting.
- Key Features:- Built feedback forms for students to rate instructors and add comments- Created admin login to view and analyze feedback data- Used Java and JSP for backend processing and MySQL for data storage- Designed responsive UI with HTML and CSS- Deployed on Apache Tomcat for stable performance

Desktop Assistant | *Python, SpeechRecognition, pyttsx3, VSCode* **Feburary 2024**

- Created a voice-enabled desktop assistant using Python that automates everyday tasks and responds to natural language commands. The assistant integrates multiple APIs to deliver real-time information such as weather updates, news headlines, and factual data. It also handles system-level operations like opening applications, managing files, and executing commands.
- Key Features:- Voice Recognition Feedback: Enabled hands-free interaction using Speech Recognition and pyttsx3 for dynamic voice input and output.- Task Automation: Streamlined routine actions like launching programs, organizing directories, and retrieving system info.

Real-Time Image to Sketch Converte | *Python, VSCODE* **janurary 2025**

- Developed a Python-based application that converts live camera input into sketch-style images using image processing techniques. Achieved 90 percent sketch accuracy during testing through algorithmic refinement.
- Key Features:- Real-time image capture and sketch conversion- Applied edge detection and grayscale filtering Optimized output with noise reduction and parameter tuning- Achieved high visual accuracy in test results- Modular codebase for easy feature expansion.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL
Developer Tools: VS Code, Android Studio,Intellij Idea, Eclipse, Apache Tomcat, Android Studio
Technologies/Frameworks: Linux, Jenkins, GitHub, JUnit, JSP, OpenCV

Soft Skills

- Quick Learner
- Hardworking
- Communication
- Disciplined and Sincere
- Problem Solving
- Team Collaboration
- Leadership
- Adaptability

Area of Interest

- Develop skills in various Technology
- Have keen interest in traveling and exploring new places with cultural significance.
- Trekking and outdoor exploration for building endurance and adaptive thinking.
- Enjoy exploring game worlds that challenge logic, timing, and teamwork.

Certifications

- Project Development Using Java for Beginners by Udemy.
- Python Programming Complete Beginner bootcamp by Udemy.
- Linux for Absolute beginners by Udemy.
